Dear Sir or Madame:

Re: Surface Water Application No. S 2-28498

We acknowledge receipt of your affidavit of publication of notice in connection with the above-numbered application.

The water codes require that no action be taken toward issuance of a permit earlier than thirty (30) days after the last date of publication. This period of time is allowed for filing any protests or objections. In some cases it is also necessary for us to await approval of the Departments of Fisheries and Wildlife before issuing permits.

A site investigation will be made by this office before we issue a permit decision. In light of our water right backlog, we estimate it will be about 18 months after receipt of your application before we are able to conduct the site investigation.

Sincerely,

**SUBJECT: Water Right Application - New Application
Applicant - U.S. Fish & Wildlife Service
Gibbons Creek, WRIA 28.0276**

Gentlemen:

Washington Department of Fisheries (WDF) has reviewed the above-referenced Water Right Application and submits the following recommendation.

Gibbons Creek supports a viable coho salmon population. Further withdrawal of water from Gibbons Creek would increase stream temperatures and reduce rearing habitat. Gibbons Creek is closed to further withdrawal except for domestic supply. Therefore, WDF requests that this request be denied.

Thank you for the opportunity to review and comment. If there are any questions regarding our comments, please call Ken Mohoric, Regional Habitat Manager, at (206) 576-6077.

Sincerely,

Gayle Kreitman
